

BUSINESS COMPANY PROFILE

ABOUT COMPANY

Eco Wealth Trust (Pvt) Ltd

Incorporated under the Companies Act No. 7 of
2007

Company Registration Number: PV00324697

About Us

Eco Wealth Trust (Pvt) Ltd is a Sri Lankan private limited company committed to sustainable agriculture and forestry investments. As a subsidiary of our mother company, which has been actively engaged in the plantation sector since 2007, we specialize in high-value teak and agri-forestry projects

ecoWealth

OUR VISION & MISSION

VISION

1. "To lead Asia's plantation investment sector by sustainably cultivating 1,000 acres of Aquilaria in Sri Lanka."
2. "To be the foremost Aquilaria plantation investor in Sri Lanka and a market leader across Asia."
3. "Transforming Sri Lanka's plantation industry through 1,000 acres of Aquilaria, setting new standards in Asia."

MISSION

1. "To sustainably grow Aquilaria plantations in Sri Lanka, delivering value and leadership in Asia's plantation investment market."
2. "To provide profitable and ethical plantation investments by cultivating 1,000 acres of Aquilaria with innovation and expertise."
3. "To set the standard in plantation investment through sustainable Aquilaria cultivation and market excellence in Asia."

Why ? Agawood as Investment

- Agawood (Aquilaria) is a high-value tree known for producing Agarwood, used in perfumes, incense, and traditional medicine.
- High returns: Agarwood is rare and commands premium market prices.
- Sustainable & eco-friendly investment with long-term growth potential.
- Increasing global demand for luxury fragrances and traditional products.

About Agawood (Agarwood / Aquilaria)

- Agawood is the resinous heartwood formed in Aquilaria trees when infected with a specific fungus.
- Known as “Liquid Gold” due to its high market value.
- Natural occurrence is rare, making cultivated Agawood highly valuable.

Plantation Details

- Number of Species: [Specify exact number, e.g., 10+ varieties of Aquilaria trees]
- Mature Time: 5–7 years (depends on inoculation and growth conditions)
- Method: Artificial inoculation to stimulate resin formation, ensuring high-quality Agawood production.

Agawood products

🌿 Agawood Products

1. Agarwood Chips (Raw Wood)

📦 What it is: Resin-rich wood pieces from infected Aquilaria trees.

🌟 Use: Burned as incense to release a rich, woody fragrance for ambience, relaxation, meditation, or religious rituals (e.g., in homes, mosques).

🌸 Benefit: Natural aromatic smoke helps create calm atmosphere.

2. Agarwood Essential Oil (Oud Oil)

🌟 What it is: Distilled oil from resinous agarwood.

🌟 Use: Luxury perfume ingredient, personal fragrance, aromatherapy.

🌸 Benefit: Very concentrated scent; long-lasting and prized in high-end fragrances.

3. Incense Products

📦 Types: Sticks, powder, cones made with agarwood or blended with other aromatics.

🌟 Use: For spiritual ceremonies, meditation, stress relief or simply scenting living spaces.

🌸 Note: Comes in many designs, from traditional sticks to artisan crafted incense powder.

4. Agarwood Tea & Herbal Infusions

📦 What it is: Tea made from agarwood leaves or processed wood.

🌟 Use: Beverage with supposed calming and health benefits.

🌸 Benefit: Rich in polyphenols, may help digestion and overall wellness.

5. Agarwood Jewelry & Accessories

🗨️ Examples: Bracelets, beads, pendants, prayer beads.

🌟 Use: Worn as a spiritual, stylish, or symbolic item.

🌸 Benefit: Combines aesthetic appeal with aromatic quality.

🧠 Quick Facts

- Agarwood forms only when the tree produces resin in response to infection or damage – making it rare and valuable.
- Traditional uses span religion, perfume, medicine, and luxury goods across Asia and the Middle East.
- Products range from raw chips to refined oils, each with different qualities and uses

Price of agawood products

Today's Agarwood (Oud) Market Price Summary (2025)

1. Agarwood (Oud) Oil – Price per Liter

- Higher-quality oud oil: \$3,000 – \$5,000+ per .

🔥 Quick Price Table (Indicative)

Product Approx. Price Range (2025) Unit

Oud Oil (premium)

\$3,000 – \$5,000+

per litre

Oud Oil (top-tier rare)

\$10,000 – \$40,000

Mper litre

Agarwood raw wood (mid)

\$1,000 – \$3,000

per kg

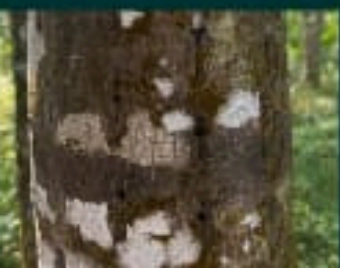

Agarwood raw wood (premium)

\$5,000 – \$30,000+

per kg

📌 Notes

- Oud oil is priced by quality and origin – commercial, perfumery, and luxury grades differ massively.
- Raw wood/log prices depend on resin content; high resonance wood (high agar resin) commands top prices.
- Agriculture markets (saplings/young trees) are low cost; mature resin-bearing trees are priced much higher but vary by seller.

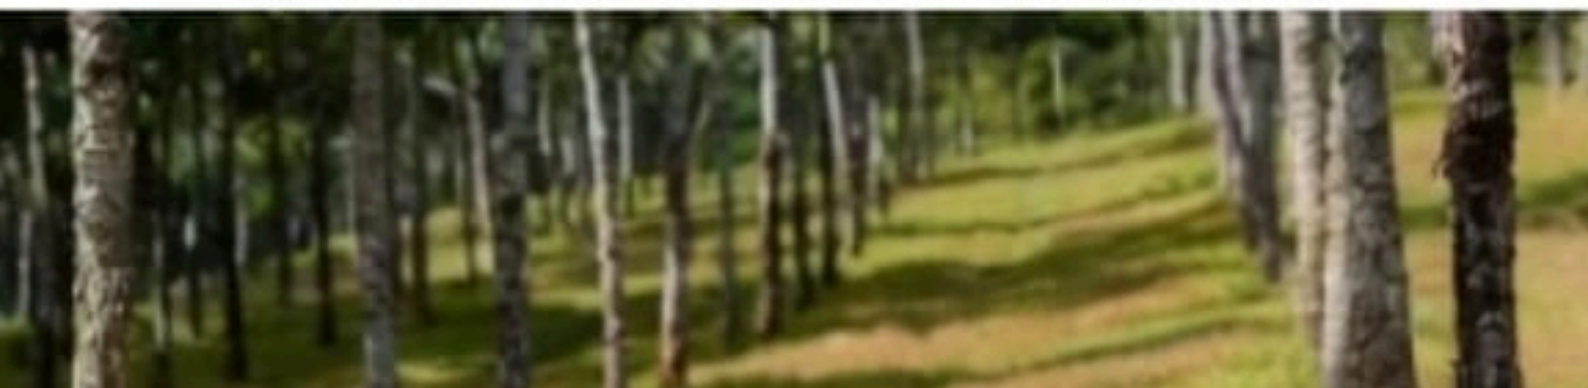

35% ROI for

Investments

How to make money from agawood

- 🌳 Agarwood Yield per Inoculated Tree (Typical)
- ✅ Average Commercial Plantation (5–8 years old)
 - Total infected wood (wet weight): 10 – 25 kg
 - Usable agarwood (dry, resinous): 1 – 5 kg per tree
- 👉 This is the most common and realistic yield in managed plantations.
- 🌿 Good Quality Inoculation (8–12 years old)
 - Total infected wood: 20 – 40 kg
 - High-quality agarwood: 3 – 8 kg per tree
 - 👉 Higher resin content = higher price per kg.
- 🌲 Excellent / Rare High-Resin Trees
 - Usable agarwood: 8 – 15 kg per tree
 - Very rare, depends on genetics, stress, and long aging
- ⚠️ Not guaranteed – should not be promised in marketing.
- 📊 Simple Investment Example (Safe for Customers)
 - Assume:
 - 1 tree = 3 kg agarwood (conservative)
 - 2025 average market price = USD 3,000/kg
 - 💰 Value per Tree
 - 3 kg × \$3,000 = \$9,000 per tree
 - 🌱 Plantation Example (100 Trees)
 - 100 × 3 kg = 300 kg
 - 300 kg × \$3,000 = \$900,000
- (Before processing, labor, taxes, and operating costs)
- 🔍 Important Notes (Builds Trust)
 - ✓ Not all trees produce agarwood
- ✓ Resin formation success rate: 60–85% (with proper inoculation)
- ✓ Yield increases with time and correct harvesting

- ✓ Oil extraction gives higher value, but lower weight yield

How to investors earn money (ROI)

Agarwood Income Chart – 600 Inoculated Trees (2025)

Assumptions (Conservative & Honest)

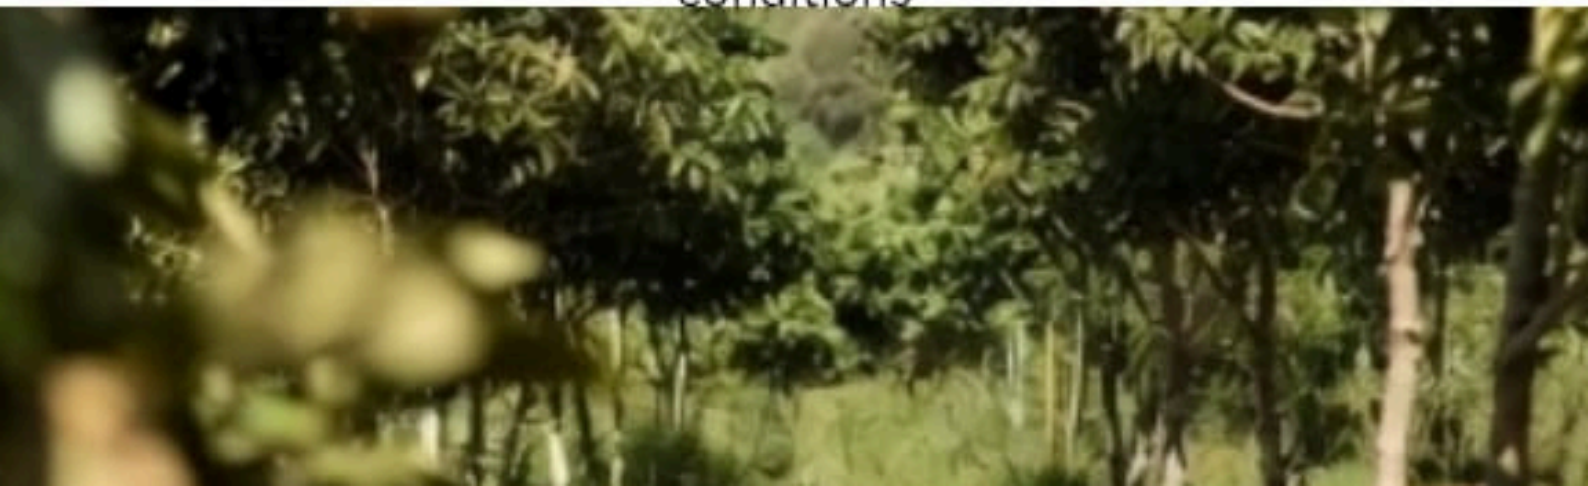

- Average yield per tree: 3 kg
- Total trees: 600
- Market price (2025 average): USD 3,000 per kg
- Product: Raw agarwood wood (not oil)

Income Calculation Table

Description	Value
Number of Trees	600
Average Agarwood per Tree	3 kg
Total Agarwood Produced	1,800 kg
Average Price per kg	USD 3,000
Estimated Total Income	USD 5,400,000)

$$600 \text{ trees} \times 3 \text{ kg} \times \$3,000/\text{kg} = \$5,400,00$$

“With conservative estimates, 600 inoculated agarwood trees can produce around 1,800 kg of marketable agarwood, with a potential gross value of USD 5.4 million, depending on quality and market conditions

Company business ventures and projects

1. Home Appliances Import & Distribution
 - Sourcing high-quality home appliances from China and Indonesia.
 - Providing reliable and affordable products for domestic and commercial markets.
 - Focused on customer satisfaction, after-sales support, and latest technology adoption.
2. Real Estate & Construction Projects
 - Engaged in residential, commercial, and housing development projects.
 - Expertise in turnkey construction, property development, and project management.
 - Commitment to sustainable construction practices and modern architectural designs.
3. Education & Training Services
 - Offering diploma and graduate courses in partnership with foreign universities.
 - Focused on career-oriented programs that enhance employability.
 - Promoting global-standard education through innovative teaching methods and international affiliations.

Vision:

To be a leading multi-sector enterprise, recognized for quality, innovation, and social impact.

Mission:

- Deliver high-quality products and services across all business ventures.
- Foster sustainable growth through strategic partnerships.
- Empower individuals and communities through education and development initiatives.
